Brand New Book ***** Print on Demand *****.Excerpt from The Principal Research Branch of the Public Health Service The National Institutes of Health constitute the principal research branch of the U.S. Public Health Service. They are six in number - the Experimental Biology and Medicine Institute, the Microbiological Institute, the National Cancer Institute, the National Heart Institute, the National Institute of Dental Research, and the National Institute of Dental Health. The scope of their program, which is carried forward by a large complement of scientists at the Institutes research center in Bethesda, Maryland, and at widely scattered field stations and laboratories, is almost as broad as the attack of disease itself on mankind. It extends into practically all fields of medical research and all branches of public health science. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
