They endow us with self-awareness, they make us laugh, they make us cry, they enable us to establish our values, and they even distinguish art from science. They enable us to distinguish the past from the future Language permeates all the crevices of our social life, and yet we take so much about it for granted. This book takes a new look at the way we use language, and how it impinges on every aspect of life by looking more at some common aspects of the readers experience, avoiding where possible the more traditional academic approaches. Man is one of the most recent species to arrive on earth, but in our fairly brief history there have already been two really significant points of change, and they can both be associated to language. The first, when it arrived, and subsequently diversified into thousands of different dialects; there are still about 6,500 active languages on earth. Secondly when, only 400 years ago, we began to use language in a new way, and science was born. Incredibly every human child learns, with comparative ease, to learn any one (sometimes more) of these languages in an amazingly small window of early childhood. Modern human culture began about 4 -500 years ago in Western Europe, and despite it being clearly an outcome of the Scientific Revolution, seldom is the question posed about what triggered this to suddenly occur, when all richness and variety of the great early civilisations of Egypt, Mesopotamia, Greece and Rome had faded. Science began to use language in a new way, and this set in motion a chain of events that, today, makes...
